News Release

Applied Radar Wins Five New DoD Contracts In 2003 Valued at Over \$2.3 Million

New Contracts include Three Phase II and Two Phase I SBIRs

Quonset/Davisville Port and Commerce Park, N. Kingstown, RI August 11, 2003 –

Applied Radar, Inc. announced today that it is the recipient of five new DoD Small Business Innovative Research (SBIR) awards in 2003. The awards include three Phase II contracts and two new Phase I contracts with various DoD agencies. "This is the first year that we have won any Phase II awards, which are much more competitive than the Phase I awards, and we were extremely fortunate to have landed three Phase II awards," says Dr. William Weedon, President/CEO of Applied Radar, Inc.

Under the DoD's Small Business Innovative Research (SBIR) program, high-tech companies with 500 employees or less compete against hundreds of DoD Phase I topics that are posted on the web twice a year (www.dodsbir.net). "It is an excellent opportunity for high-tech startups with innovative ideas to get R+D funding and develop a product," says Weedon. The Phase I awards are typically for 6-9 months with a \$70K - \$120K contract, depending on the DoD agency. The Phase II proposals are by invitation only to companies that have successfully completed Phase I and are for two years and typically valued at around \$750K.

Applied Radar, Inc.'s new SBIR awards for 2003 are listed in the table below:

Agency	Contract	Title	Amount	Dates
US Air Force Research Lab.	F19628-03-C-0024	X-Band Digital Transmit Module for DBF Transmit/Receive Array	\$697,929.	5/03 – 6/05
DARPA US Army AAMCOM	DAAH01-03-C-R200	Space-Based E-Textile Antenna Array	\$654,025.	6/03 – 7/05
US Army CECOM	DAAB07-03-C-L410 Phase I Option Phase II in process	X-Band Interferometric Radar (XBIR) for MMR Precision Tracking	\$69,834. \$49,917. \$730,000.*	12/02 – 6/03 9/03 – 12/03 1/04 – 2/05
US Air Force Research Lab.	F19628-03-C-0084	EHF Wideband Digital Beamforming Array for SATCOM	\$99,976.	7/03 – 4/04
MDA US Army SMDC	DASG60-03-P-0202	Wideband Radar Digital Beamforming for Missile Defense Applications	\$69,673.	7/03 – 1/04
		Total	\$2,371,354	

* Phase II contract negotiations in process.

Applied Radar Inc. is a research and development company focusing on the development of microwave radar and communications systems and based in the Quonset/Davisville Port and Commerce Park in North Kingstown, RI.
